		Day 1, November 25th		
8:00	Registration (8:00-8:45)			
8:45	Welcome (8:45-9:10) - Mike Kasumovic			
9:10 9:30 9:45 10:00	Student Plenaries: Erin Macartney, Damien Esquerre, Emily Roycroft (9:10-10:10), Chair - Lisa Schwanz			
	Room 5	Room 6	Room 7	
	Co-Evolution Genomics, Chair - Rebecca Adrian	IUSSI, Chair - Simon Robson	Genetic Rescue, Chair - Timothee Bonnet	
10:15	Carla Sgro - Sex-specific adaptation to environmental change	Simon Tierney - Social biology of an allodapine bee from the Blue Mountains Range	Georgina Wood - Combining genomics and meta'omics with phenotypic and environmental associations to facilitate future-proofing strategies in marine forest restoration	
10:30	Tom Keaney - Do males matter for mitochondrial genome evolution?	Ben Oldroyd - A single gene defines a subspecies: the thelytoky locus of the Cape honey bee	Yael Rodger - Past and present genetic connectivity of a highly fragmented, endangered grassland daisy, Rutidosis leptorrhynchoides	
10:45	Mikko Kivikoski - Effects of crossing-over interference on genomic recombination landscape	Paul Broekhuyse - A single gene is driving a subspeciation event in South African honey bees	Paul Rymer - Adaptive capacity to climate change through genomic variation and phenotypic plasticity	
11:00 11:15	Coffee break (11:00-11:30)			
	Diversity and Variation, Chair - Rose Andrew	IUSSI, Chair - Simon Tierney	Plasticty, Chair - Dan Noble	
	Carlos Joaquin Pavon Vazquez - Confirming the Australian origin of the Komodo dragon and revealing ancient gene flow with Australian monitor lizards through an integrative approach	Boris Yagound - Do honey bees faithfully transmit epigenetic marks to their offspring?	Erik Wapstra - Developmental plasticity: within and between population variation in phenological reaction norms in a lizard	
11:45	Runa Kvamme Ekrem - Aiming for the moon: Maintenance of local adaptation to tidal regime	Carmen da Silva - Thermal adaptation with altitude in Fijian bees	Belinda van Heerwaarden - Constraints in upper thermal fertility limits suggest increased vulnerability to climate change	
12:00	Simon Griffith - Colour, sperm and chromosomal inversions across the contact zone of two sub-species of finch in northern Australia	Thomas Gillard - Honey bee STDs: under-reported, under-studied, or a non-issue?	Vanessa Kellermann - Comparing thermal performance curves across traits: how consistent are they?	
12:15	Jason Kennington - A long goodbye – a genomic view of a species extinction			
12:20	Oliver Stuart - Glacier genetics: phylogenetic placement and species delimitation of the Rocky Mountain locust, Melanoplus spretus, using glacier-preserved samples			
12:25		Daisy Kocher - Queen pheromones and the evolution of eusociality	Daniel Noble - Plastic responses to novel environments are biased towards phenotype dimensions with high additive genetic variation	
12:30		Tarli Conroy - Social immunity in the honeybee: self- sacrifice and forced ejection	Luke Amjah - Redundancy analysis identifies environmental drivers of phenotype in a recent invasion	
12:35 12:40				
13:00		Lunch / IUSSI Meeting (12:40-1:45) (Room 4)		
13:15				

13:30	Parental Effects, Chair - Angela Crean	Sexual Selection, Chair - Bruno Buzatto	Adaptation, Chair - Paul Rymer
	Madeleine Beekman - Ectothermic vertebrates are too cool to care – explaining the absence of parental provisioning in reptiles, amphibians and fish	Thomas White - Flies exploit predictable perspectives and backgrounds to enhance iridescent signal contrast and mating success	Collin Ahrens - Adaptation to temperature among closely related tree species with similar distributions is driven by divergent evolution
13:45	Mylene Mariette - Embryonic eavesdropping on parental calls: implications for parent-offspring conflict	Pietro Pollo - When should male mate choice evolve?	Brodie Foster -Anthropogenic deforestation drives flight loss in a wing-polymorphic stonefly
14:00	Nathan Burke - Intralocus sexual conflict explains diverse patterns of inheritance of parental effects	Upama Aich - Should females mate with experienced males? Indirect effects of sexual experience on offspring fitness.	Beatrice Apirajkamol - Effect of oxidative stress on phenotype, gene function, and telomere length in Helicoverpa armigera (Lepidoptera: Noctuidae)
14:15	Joanna Rutkowska - How strong are non-genetic paternal effects compared to maternal ones? A meta- analysis of studies with dietary exposure in full- factorial experimental setup	Suzanna Gooley - Understanding the effect of demographics and background on mate preference and courtship investment in humans.	Mitchell Hodgson - Genetic and Non-genetic sources of variation in thermal traits in a Temperate Australian Lizard
14:30	Sarin Tiatragul - Anolis lizard nesting behaviour enhances embryo survival and development in urban areas	Michaela Parascandalo - Effects of increased sexual interaction on female reproductive success in Drosophila melanogaster are contingent on the history of sexual selection	Alizee Meillere - Effects of early-life anthropogenic noise exposure on development in the zebra finch
14:45	Robert Laird - Parental age effects and the evolution of senescence	Jon Evans - Dietary stress increases the total opportunity for sexual selection and modifies selection on condition- dependent traits	Jake Martin - Sex and drugs: impacts of the pharmaceutical pollutant fluoxetine on female mate choice in the guppy, Poecilia reticulata
15:00	Renee Firman - Maternal stress leads to offspring sex ratio skews that mitigate male-male competition	Maider Iglesias-Carrasco - Sex in the City: sexual selection and urban colonization in passerines	Lucinda Aulsebrook - Evolutionary impacts of the pharmaceutical pollutant fluoxetine on Daphnia magna
15:05	Xiyan Xiong - Modelling the effect of caesarean section and formula feeding on the development of human gut microbiota		Claudia Crowther - Examining the link between seasonal differences in pivotal temperature and egg mass in the freshwater turtle, Chrysemys picta
15:10			
		Coffee break (3:15-3:45)	
15:15			
15:30	Population Genetics, Chair - Mark de Bruyn	Plasticty, Chair - Dan Noble	Adaptation, Chair - Mylene Mariette
15:30	Rosalyn Gloag - Do invasive honey bees benefit from the high mutability of their sex locus?	Plasticty, Chair - Dan Noble Stephen Bonser - Costs and benefits of plasticity in the size at reproduction in short-lived plants	Adaptation, Chair - Mylene Mariette Christina Miller - Using genetically divergent populations of zebrafish to better understand the interaction of genetic and thermal determinants of
	Rosalyn Gloag - Do invasive honey bees benefit from	Stephen Bonser - Costs and benefits of plasticity in the	Christina Miller - Using genetically divergent populations of zebrafish to better understand the
15:45	Rosalyn Gloag - Do invasive honey bees benefit from the high mutability of their sex locus? Katarina Stuart - Local signatures of founding populations confound examination of adaptive	Stephen Bonser - Costs and benefits of plasticity in the size at reproduction in short-lived plants Hayley Cameron - Can competitive asymmetries	Christina Miller - Using genetically divergent populations of zebrafish to better understand the interaction of genetic and thermal determinants of Chun-Chia Chou - Effects of temperature on
15:45 16:00	Rosalyn Gloag - Do invasive honey bees benefit from the high mutability of their sex locus? Katarina Stuart - Local signatures of founding populations confound examination of adaptive divergence in invasive populations Iva Popovic - Twin introductions by independent invader mussel lineages are both associated with	Stephen Bonser - Costs and benefits of plasticity in the size at reproduction in short-lived plants Hayley Cameron - Can competitive asymmetries maintain offspring size variation Lisa Schwanz - Extreme temperatures and loss of	Christina Miller - Using genetically divergent populations of zebrafish to better understand the interaction of genetic and thermal determinants of Chun-Chia Chou - Effects of temperature on reproductive timing in a tropical ectotherm Brooke Zanco - The role of nutrition in mediating larval trait responses to temperature is population specific in
15:45 16:00 16:15	Rosalyn Gloag - Do invasive honey bees benefit from the high mutability of their sex locus? Katarina Stuart - Local signatures of founding populations confound examination of adaptive divergence in invasive populations Iva Popovic - Twin introductions by independent invader mussel lineages are both associated with recent admixture with a native congener in Australia Joshua Thia - The scale of genotype-phenotype-environment associations in panmictic marine	Stephen Bonser - Costs and benefits of plasticity in the size at reproduction in short-lived plants Hayley Cameron - Can competitive asymmetries maintain offspring size variation Lisa Schwanz - Extreme temperatures and loss of canalization Geoff While - Co-evolutionary dynamics between life	Christina Miller - Using genetically divergent populations of zebrafish to better understand the interaction of genetic and thermal determinants of Chun-Chia Chou - Effects of temperature on reproductive timing in a tropical ectotherm Brooke Zanco - The role of nutrition in mediating larval trait responses to temperature is population specific in Drosophila melanogaster Anais Pessato - Early acoustic experience affects adult
15:45 16:00 16:15	Rosalyn Gloag - Do invasive honey bees benefit from the high mutability of their sex locus? Katarina Stuart - Local signatures of founding populations confound examination of adaptive divergence in invasive populations Iva Popovic - Twin introductions by independent invader mussel lineages are both associated with recent admixture with a native congener in Australia Joshua Thia - The scale of genotype-phenotype-environment associations in panmictic marine populations	Stephen Bonser - Costs and benefits of plasticity in the size at reproduction in short-lived plants Hayley Cameron - Can competitive asymmetries maintain offspring size variation Lisa Schwanz - Extreme temperatures and loss of canalization Geoff While - Co-evolutionary dynamics between life history, ecology and social living in lizards Atsumi Keisuke - Hybridization reduces the variation of male	Christina Miller - Using genetically divergent populations of zebrafish to better understand the interaction of genetic and thermal determinants of Chun-Chia Chou - Effects of temperature on reproductive timing in a tropical ectotherm Brooke Zanco - The role of nutrition in mediating larval trait responses to temperature is population specific in Drosophila melanogaster Anais Pessato - Early acoustic experience affects adult thermoregulation in the heat in zebra finches Avishikta Chakraborty - How does genetic variation modulate developmental plasticity in response to
